WHAT ARE **PROBIOTICS**?

Probiotics are beneficial bacteria; balancing microflora and they are beneficial balancers and cleansing bacteria that neutralize harmful bacteria.

How do probiotic cleaners work?

Probiotics penetrate into the secret biofilm, where 90% of harmful bacteria are stored. So, it reaches the source of harmful bacteria. It increases the number of useful bacteria, consumes the nutrients of harmful bacteria, and neutralizes them. Thus, it provides hygiene, and prevents the formation of allergens and viruses.

What is biofilm? How to destroy?

Biofilm is like a microscopic city full of all kinds of harmful bacteria and microbes. They are found on almost all surfaces that are wet and hot. In hospitals, 65% of certain types of infections are said to be a result of diseases that live and hide in biofilms (e.g., H1N1, MRSA, Staph, E. coli).

However, the unexpected situation is that it cannot be removed with any cleaning products, including biofilm acids. Even the strongest disinfectant cannot penetrate the hard-shell-like layers. Biofilm is an armored house for bacteria to live.

When you remove the biofilm, microbes and viruses have nowhere to live and multiply, and this will cause them to die. Therefore, destroying the biofilm is very important for a healthy home.

Biofilm is also a nutrient source for probiotics. In contrast to toxic cleaners, probiotics literally eat and destroy biofilms that keep bacteria and viruses that can make you and your family sick.

Properties of probiotic products

The biofilm removes the dirt from the surface and prevents it from accumulating in layers.

It is safe to use in all materials such as metal, wood, rubber, plastic, varnish, paint fabric and leather.

It is not flammable, no explosion hazard. It is 100% natural.

It completely eliminates the bad odors and allergic effects that occur in your home.

It does not harm the environment; it biologically disintegrates and mixes with nature.

Does not cause toxic effects and allergic reactions.

Does not damage the eyes, skin or airways.

It does not turn into harmful gases when exposed to heat.

Has disinfection effect.

Why not use a chemical cleaner?

We've all heard some ads claiming that some chemical / toxic cleaners reduce 99.9% of bacteria.

Why isn't that a good thing?

Because this kind of useful bacteria, along with the harmful bacteria are destroyed.

However, for a healthy life, we need probiotics, i.e. beneficial bacteria, both inside and outside our body.

Probiotics (useful bacteria) included in these products decrease food of pathogen (harmful) bacteria and provide decrease of their numbers by biological method. You can provide healthy, clean and safe living space by using these products and prevent odor issues, infections, allergies (both animal and human), skin and coat problems.

PRODAY products are based on 100% natural ingredients and are enriched with active probiotics. They significantly reduce the risk of bad smells and infections and promote healthy microflora in the environment. In view of the crucial importance of good animal hygiene, it has developed special high-quality products, enriched with 100% natural probiotics. PRODAY is the perfect solution for all animal lovers who want only the best care for their pets and a product that respects people, animals and the environment.

PET SHAMPOO

Shampoos that do not have appropriate ingredients for cat and dog skin or contain high acid disrupt the flora of the skin, causing allergies, flaking, bad odor and damage. PRODAY pet shampoo contains 100% natural probiotics. It keeps your pet's fur, coat and skin clean and free from allergens and unpleasant odors. This shampoo is 100% safe for people and animals. Non-toxic. Environmentally friendly and soluble in nature.

Minimizes the risk of allergic reactions

A healthy coat or fur is extremely important for your pet's overall health. If it is dirty or uncared, this can lead to skin problems, allergies or unpleasant odors. The probiotics in PRODAY Pet Shampoo actively remove dirt and allergens in your pet's coat, keeping it clean and healthy. Your pet will feel happier and will no longer spread unpleasant odors.

Probiotics are environmentally friendly

Many animals have skin problems or allergies. Fur or coat often attracts dirt, allergens or harmful micro-organisms. We developed this probiotic shampoo to keep your pet's fur or coat as clean as possible. Not only does this benefit the animal; it also helps people who are allergic to substances in animal fur and coat. As well as being 100% natural, probiotics also actively contribute to maintaining the environment.

This product provides maximum benefit when used with PRODAY ANTI-ALLERGEN SPRAY.

PET ORAL CARE

We must protect our pets internally and externally. The drinkable PRODAY Pet Oral Care is a miraculous product that provides internal protection with 100% natural probiotics and controls the bacteria that cause bad smell in the mouth, provides a healthy and fresh breath.

PRODAY Oral Care;

- ▶ Contains 100% natural probiotics
- ▶ Is a concentrated product to be mixed with water
- ▶ Prevents plaque formation
- ▶ Strengthens the immune system
- ▶ Regulates the digestive system
- ▶ Minimizes feces odor
- ▶ Odorless and tasteless
- ▶ Non-toxic and drug-free
- ▶ 100% environmentally friendly and soluble in nature

GENERAL CLEANER

PRODAY General Cleaning product is enriched with 100% natural probiotics. Suitable for all kinds of hard floors and water-resistant surfaces. Oil and dirt remover. Effective cleaning even in the smallest pores. Removes bad odors. Creates a healthy and hygienic environment. Does not leave stains on the surface. Creates an antistatic film. Provides late pollination and late contamination effect. Phosphate-free, recyclable, nonvolatile. Economic. Thanks to the probiotics content, cleaning will continue for a long time without your intervention.

Use probiotics to remove your PET's unpleasant odors

PRODAY General Cleaning is also a smell remover probiotic spray for animals' environment. It contains probiotics that actively prevent the unpleasant smells that animals can produce. Especially each time the cat litter is used, urine and harmful bacteria settle into scratches on the surface of the litter tray. These harmful microorganisms can cause bad smells and disease over time. Especially the smell of urine is inevitable. PRODAY General Cleaner provides all necessary hygiene. The probiotics in this product actively remove the smells. It also ensures healthy microflora in the environment and significantly reduces the risk of germs. You can also spray the litter tray after it has been changed one a day to keep it clean for longer, taking care not to make it wet.

Guarantees healthy microflora

Odors are usually caused by digestive gasses released by micro-organisms. The probiotics sprayed on the animal's places digest nutrients without producing an odor. In the short term, they also ensure a larger number of micro-organisms that do not produce any odor. This effectively combats odors both on and around your pet.

As well as being 100% natural, probiotics also actively contribute to maintaining the environment.

ANTI-ALLERGEN SPRAY

Everyone thinks that the fur and coat of pets are allergic. However, the hair itself is not allergen. Allergy occurs against the proteins produced by bacteria consuming substances such as pollen and mold adhering to the hairs of some of the secretions in the salivary, urine, sweat, feces and sebaceous glands of pets.

Dust mites in the environment, allergens and harmful bacteria from cats and dogs are often found in carpets, sheets, pillows, armchairs, curtains, fur of cats / dogs and furry articles. Allergens are transmitted to humans by skin contact or respiration, causing dust mite allergy, mite allergy, cat / dog allergy.

The 100% natural probiotics in the Anti-Allergy Spray are fed with allergens from your dog's saliva, urine, fat, feces and sweat gland secretions, which come with your dog. In addition, by consuming the food sources of allergen-producing harmful bacteria, provides them going into sleep mode.

PRODAY Anti-Allergen Spray is a probiotic allergen spray for humans, animals and their surroundings. The probiotics actively remove allergens, promote healthy microflora in the environment and reduce the risk of germs. Many animals have skin problems or allergies. Their fur or coat often attracts dirt, allergens and harmful micro-organisms. We developed this probiotic spray to keep your pet's fur or coat as clean as possible.

Benefices:

It prevents you from allergic reaction by creating a healthy and balanced microflora in the area where you live with your pets.

Trillions of probiotics sent to the environment in each spraying work actively.

When used regularly, it creates a healthy microflora in and around your pets, greatly reducing the risk of illness for you and your pets.

With probiotics in Anti-Allergy Spray content;

- ▶ Protects against cat, dog allergy and dust mite allergy.
- ▶ Biological ways to neutralize allergens that cause reactions such as sneezing, itching and eye leakage.
- ▶ It is effective in dust mite, mold and spring allergies.
- ▶ In regular use, it is effective in reducing allergy symptoms by improving immunity.
- ▶ Contains 100% natural stabilized probiotics.
- ▶ Safe to use for adults, children and animals.
- ▶ Non-toxic and drug-free.
- ▶ It is 100% environment friendly and soluble in nature.
- ▶ You can safely use in baby and children room.
- ▶ It does not contain harmful chemicals such as Perfume, Paint, SLES, Phthalate, Chlorine, Paraben, Formaldehyde, Phosphate.

PROFESSIONAL USERS:

For the professional animal owners (livestock, poultry farms, pig farms, aquaculture) we have an Animal Housing range (Animal House Cleaner, Animal House Stabilizer, Specifically for aquariums etc.). This requires professional guidance and application.

Important! These products work when used regularly. When consumed in accordance with the recommendations for use, clear results begin to appear within 12-15 days.

Important! Probiotics are living microorganisms. The probiotics contained in the PRODAY products continue active cleaning for 72 hours after cleaning. If you use PRODAY product, the use of disinfectants and chemical cleaners (bleach and antibacterial soap, etc.) in the same environment will destroy the probiotics. Store the product away from direct sunlight at a temperature between 5°C and 45°C.
